SUMMARY

AI Automation Specialist with hands-on experience in building AI-powered automation systems and intelligent agents using n8n, OpenAI, APIs, and database integrations. Skilled in developing end-to-end workflows for lead qualification, customer communication, academic reporting, and business process automation.

Experienced in integrating AI capabilities with business systems, automating repetitive tasks, and transforming data into actionable insights. Focused on developing reliable, scalable automation solutions that improve operational efficiency, streamline workflows, and reduce manual effort.

PROJECTS

AI Sales Agent — Real Estate Automation

Developed an omnichannel AI-powered Sales Agent for real estate businesses, designed to interact with potential customers across WhatsApp, Facebook Messenger, Instagram, and Website chat. The system automatically understands customer requirements, extracts key details such as budget, location, property type, rooms, and purchase timeline, then scores and classifies leads as HOT, WARM, or COLD. Qualified leads are automatically captured and routed to the sales team for follow-up, enabling faster responses and reducing manual lead qualification.

Technologies: n8n, AI Agents, OpenAI, APIs, WhatsApp, Facebook Messenger, Instagram, Website Chat, PostgreSQL/Supabase.

AI-Powered School Intelligence & Automation System

Developed an AI-powered school automation system that analyzes student performance data, detects academic decline and at-risk students, generates personalized intervention plans, and automatically creates and delivers performance reports to parents via WhatsApp and Email. The system also includes an AI Parent Assistant that provides instant, data-grounded answers about student progress in Arabic and English, enabling schools to transform raw academic data into actionable insights and automated communication.

Technologies: n8n, AI Agents, OpenAI, APIs, WhatsApp, Email, Automation Workflows, PostgreSQL/Supabase.

AI Social Media Automation

Designed and implemented an AI-powered social media automation system using n8n, AI Agents, APIs, and CRM integrations to automate content generation, scheduling, publishing, message/comment handling, lead detection, sentiment analysis, and performance insights across multiple platforms.

EDUCATION

Minya National University - Computer Science and Artificial Intelligence

SKILLS

- n8n
- Workflow Automation
- AI Agent Development
- Prompt Engineering
- LLM Integration
- OpenAI API
- REST APIs & Webhooks
- API Integration
- Python
- JavaScript
- JSON Data Handling
- SQL
- PostgreSQL
- Docker
- Git & GitHub
- Error Handling & Debugging
- AI Workflow Testing & Evaluation
- Problem Solving
- Communication
- Project Management

LANGUAGES

English

Arabic
